

MEMORANDUM FOR Table Rock Project Office Personnel

SUBJECT: Project Policy #05-02, Placement of Personal Watercraft (PWC) lifts on private floating facilities.

1. POLICY: It is the intent of this policy to provide a standard operating procedure for regulating placement of PWC lifts on private floating facilities on Table Rock Lake.
2. BACKGROUND: There have been an increasing amount of requests in our duty room to allow PWC lifts on private docks. The *Shoreline Management Plan for Table Rock Lake* (SMP) does not address PWC lifts on private docks.
3. GUIDANCE:
 - a. PWC lifts will be allowed to be placed in either existing slips or along the shoreline side of the dock.
 - b. Only current owners within the dock will be allowed to place PWC lifts on the shoreline side of the dock.
 - c. Placement of PWC lifts along the shoreline side of the dock will require majority approval of the slip owners within the dock. Approval must include the slip(s) directly adjacent to where the PWC lift will be attached.
4. This policy will remain in affect until rescinded.

Kenneth R. Foersterling
Operations Manager
